Male Customers Drive 68% of Revenue

Gender Revenue Breakdown

Male customers account for **\$157,890** in revenue — more than double the **\$75,191** generated by female customers.

This 68/32 split in both customer count and revenue contribution signals a strong skew toward male purchasing behavior across all four product categories.

- The revenue ratio mirrors the customer base ratio — indicating no significant difference in spend per gender.

Subscription Paradox: Non-Subscribers Generate 73% of Revenue

The Counterintuitive Finding

Despite subscription programs typically being designed to drive loyalty and spend, **non-subscribers dominate revenue contribution** by a wide margin.

- **Subscribers (27%):** 1,053 customers — \$62,645 total revenue
- **Non-subscribers (73%):** 2,847 customers — \$170,436 total revenue

Critically, average spend is nearly identical: **\$59.49** (subscribers) vs. **\$59.87** (non-subscribers) — meaning volume, not behavior, drives the gap.

Loyal Customers Dominate: 80% of Base

Loyal

3,116 customers

80% of total base — the backbone of recurring revenue

Returning

701 customers

18% — reactivated or occasional buyers with conversion potential

New

83 customers

2% — minimal new acquisition; retention is the clear growth engine

Clothing Drives Category Revenue

Category Performance at a Glance

Clothing is the clear category leader at **\$90K** (39% of total revenue), driven by 1,800 orders from top products including Blouse, Pants, and Shirt.

Accessories follow at **\$60K** with Jewelry and Sunglasses as standout performers. Footwear contributes **\$30K** across 600 orders — a smaller but potentially underpenetrated segment.

Young Adults Lead by Age Group

Age Group

Young Adults aged 18-30 represent the highest-revenue age cohort at **\$62,143**, outpacing all older segments. Revenue distribution is relatively even across groups, suggesting broad demographic appeal — but Young Adults offer the greatest upside for targeted growth campaigns.

Discount Strategy: 50% of Hat Sales Require Discounts

High Discount Dependency by Product

Hat — 50.0%

Highest discount rate in the entire catalog

Sneakers — 49.7%

Nearly half of all Sneaker sales discounted

Coat — 49.1%

Margin pressure risk on a high-ticket item

839 customers spent above the \$59.76 average even with discounts applied — suggesting a cohort with strong intent that may not require price incentives to convert.

Strategic Recommendations

1 Unlock Subscription Value

Non-subscribers generate 73% of revenue. Convert them with exclusive benefits, early access, or loyalty perks — the spend behavior is already there.

2 Optimize Discounting

Review margin impact on Hat, Sneakers, and Coat. With 839 above-average spenders already buying on discount, selective pricing could protect profitability without sacrificing volume.

3 Target Young Adults

The 18–30 cohort is the highest-revenue age group. Expand marketing investment here to amplify the segment already driving the most spend.
